

Collection No. 54.

K.H.L. Key.

15/3/54

Near Granfell, N.S.W.

Proceeded on Tolus road.

15/3/54. 59039. Granfell. / 041. Rocky hill to right of road. Granite(?)
Goniaca sp., *Phaulacridium vittatum*,
Phaulacridium sp. n., *Macrotona australis*, *M. scabriformis*
(spec.). *Blakelyi* (slight tendency towards *dealbata*), a large,
very narrow-leaved mallee with very rough bark, & *Callitris*
calcarata. Rather sparse shrub stratum of *Hibbertia* sp.,
"blue grass lily", dry ferns, etc.; few grasses. This leads
into *Sideroxylon blakelyi*, with occ. *macrorhyncha*, on
lower slopes. *P. vittatum* the most numerous species.
The *Goniaca* with blue hind tibiae had these & the adjacent
areas of the femur much bluer in life. Many of the specimens
discoloured by too long retention in killing-bottle. Chort.
